Le Van Khoa

Software Engineer

0766 772 215 levankhoa2004@gmail.com GitHub LinkedIn khoa.dev Ho Chi Minh City, Vietnam

CAREER OBJECTIVE

Final-year IT student and passionate **Software Engineer** specializing in web development, mobile applications, and system architecture. With hands-on experience building full-stack platforms using **ReactJS, Next.js, Node.js, and Flutter**, I pride myself on writing clean, scalable code and delivering excellent user experiences. Seeking opportunities to tackle complex technical challenges, collaborate with talented teams, and continuously expand my expertise in modern cloud and development technologies.

EDUCATION

Ho Chi Minh City University of Technology (HUTECH) 2022 – 2026

Bachelor of Information Technology — Major: Software Engineering

GPA: 3.4 / 4.0 — Top 16 National Informatics Olympiad

COMPREHENSIVE SKILLS OVERVIEW

Languages	TypeScript, JavaScript, Python, Dart, HTML5/CSS3
Frontend Technologies	ReactJS, Next.js 16 (App Router), Tailwind CSS, Framer Motion, Zustand, Redux
Backend & APIs	Node.js, Express, FastAPI, REST APIs, Prisma ORM, MySQL, SQLite
Mobile Development	Flutter, Dart, Flame Engine (Game Development)
Cloud & DevOps	AWS, Google Cloud Platform (GCP), Cloudflare, Vercel, Docker, GitHub Actions CI/CD
Tools & Workflow	Git/GitHub, Postman, Vite, Vitest, testing libraries, Figma → Code translation
Soft Skills	Agile collaboration, technical documentation, complex problem solving, self-taught autonomy

HIGHLIGHTED PROJECTS

SmartHire — AI-Powered Recruitment Platform 2026

Frontend Developer · Next.js 16 · TypeScript · Tailwind CSS · Zustand · Framer Motion

- Owned **10 feature modules** including Dashboard, Pipeline Kanban (drag-drop via dnd-kit), and Interview system (chat UI, evaluation panel).
- Established a unified **Design System** enforcing 150+ styling tokens; refactored & consolidated shared UI components mapping to complex state.
- Configured **GitHub Actions CI/CD** pipeline; resolved TypeScript strict errors and optimized system-wide dark mode.

▸ GitHub Repo ▸ Live Demo

IELTS Learning Platform 2025 – 2026

Fullstack Developer · ReactJS · Vite · Zustand · Node.js · Express · Prisma · MySQL

- Solo-developed end-to-end fullstack platform: **9 frontend pages** and **11 REST API modules** handling Auth, Listening/Reading progress, and Gamification badges.
- Fixed memory leak issues in the custom audio player; built a scalable, containerized architecture using **Docker**.
- Wrote extensive unit tests with **Vitest + React Testing Library** ensuring 85%+ coverage for critical logic.

▸ GitHub Repo ▸ Live Demo

Personal Finance Manager (Mobile App) 2025

Mobile Developer · Flutter · Dart · SQLite

- Developed a cross-platform mobile application utilizing **Flutter** to track granular daily expenses and income streams.
- Implemented a robust local-first database using **SQLite** with optimized query performance for instant financial reporting and reactive UI updates.

▸ GitHub Repo

GamePlus (Mobile Game Infrastructure) 2025

Game Developer · Flutter · Flame Engine · FastAPI

- Engineered a 2D mobile game using the **Flame Engine** in Flutter, including custom physics, collision handling, and sprite animations.
- Built a high-performance backend using **Python FastAPI** to manage leaderboards, user progression, and real-time syncing.

▸ GitHub Repo

Reroll-DoMiXi (Interactive Web App) 2024

Frontend Developer · Next.js · TypeScript · CSS

- Built a responsive, highly interactive web application leveraging the power of **Next.js App Router** and statically generated data.
- Developed complex UI logic entirely typed with **TypeScript** for maximum runtime reliability.

HONORS & AWARDS

🏆 **Top 16 National List** — 34th National Informatics Olympiad, PROCON Track (2025)
🥇 **Encouragement Award** — Design Your Future Competition (2025)
🥇 **Encouragement Award** — PROCON HUTECH Algorithm Competition (2025)
🥉 **3rd Prize** — University Individual Programming Contest (2024)

EXTRACURRICULAR ACTIVITIES

PROCON — Informatics Olympiad Club, HUTECH 2025 – 2026

Algorithm Competitor

- Trained intensively in competitive programming, advanced **data structures, and algorithm optimization**.
- Represented the university at the national level; developed resilience and teamwork under intensive time constraints.

CERTIFICATIONS & LANGUAGES

English — CEFR B1+ Equivalent (Fluent reading of technical documentation, professional written communication)

Vietnamese (Native)
